OBJECTIVE

Highly motivated Computer Science undergraduate student at Binus University with strong curiosity and a drive to learn and grow in the technology sector. Possesses a solid foundation in programming languages including Python, C, Java, HTML, CSS, and JavaScript. Experienced in extracurricular development projects, data science training, and programming competitions to hone analytical and problem-solving skills. Enthusiastic about leveraging data processing and contributing positively to a professional work environment.

EDUCATION

Binus University | Tangerang, Indonesia

Bachelor of Computer Science (August 2024 - Present [Expected Graduation: June 2028])

- Pursuing bachelor degree in Computer Science with specialisation in Database Technology

SMAN St. Albertus | Malang, Indonesia

High School Diploma in Mathematics and Natural Sciences (July 2021 - May 2024)

- Ranked among the Top 5 academic performers in class for outstanding academic performance

EXPERIENCE

Medisaya | Singapore

Software Engineer Intern (Jul 2025 - October 2025)

- Developed a Python-based data pipeline to scrape and consolidate over 5,000+ medicines, capturing description, usage, and side effects for healthcare data analysis.
- Implemented retry logic, proxy handling, and Selenium fallback to ensure stable scraping at scale, reducing failed requests by over 90%.
- Conducted end-to-end research and technical scoping for the Elderly Active Rehab module of Medisaya's rehabilitation platform.
- Designed user flows for Prescribed Exercises, Progress Tracking, Motivation & Monitoring, and Pain/Difficulty Monitor, integrating therapist caregiver senior perspectives.
- Defined acceptance criteria, data fields, and notification logic to enable digital workflow integration and system rollout.
- Produced competitive analysis and UI/UX reference sets to guide design and development handoff.

360Cogni | Singapore

Data Analytics Intern (Jul 2026 - Present)

- Built the post-launch analytics report for a brain-health screening platform, covering traffic sources, device and geographic breakdowns, and the full screening funnel, using Google Analytics and read-only SQL queries against a Supabase (PostgreSQL) backend.
- Identified and corrected data quality issues that changed reported figures, including a Google OAuth sign-up flow that never fired the sign_up event and undercounted real accounts, and a funnel that measured sessions rather than unique people.
- Discovered a production defect during release testing and reproduced it through controlled test runs, then validated the fix across test and production environments before sign-off.
- Proposed and drafted the move from static weekly PDF reports to a live interactive analytics dashboard on PostHog, and presented it to the team.
- Set up UTM(Urchin Tracking Module) campaign tracking for marketing events and verified attribution in Google Analytics, flagging redirect behaviour that would otherwise have made campaign traffic invisible to analytics.
- Configured PostHog event analytics for the platform and flagged a privacy issue where autocapture was recording sensitive health screening answers, then defined and verified a fix to exclude that data from tracking.

ACADEMIC PROJECTS

"Setrum" Electricity Usage Tracker App [Figma]

- Designed a mobile and web application for real-time household electricity tracking and bill estimation as part of a five-person team, taking it from user research and a product requirement document to a high-fidelity Figma prototype.
- Led the usability evaluation using the System Usability Scale (SUS), where the prototype scored in the excellent range, and authored a heuristic evaluation that identified key interface issues to improve

"Laporin" Road Infrastructure Reporting Platform [Flutter, React, Supabase]

- Built a citizen reporting platform with a Flutter mobile app, a React admin dashboard, and a Supabase backend, integrating Google Maps for precise damage locations, developed using Agile Scrum across ten sprints in a five-person team.
- Contributed the problem definition, admin dashboard UI design in Figma, and testing documentation, and validated the build through black box testing and a 20-respondent requirements survey.

Slang Dictionary Console App "Boogle" [C]

- Developed a console-based application to create, document, and manage a modern slang dictionary.
- Designed and implemented core functionalities, including adding new terms, searching for entries, and displaying data.

“Sinefolis” Cinema Website [HTML, CSS, JavaScript, Figma]

- Designed a high-fidelity website prototype in Figma, focusing on user experience (UX), layout consistency, and color schemes.
- Developed a fully responsive five-page website using HTML, CSS, and JavaScript, ensuring optimal functionality and display on both desktop and mobile devices.

“momE” [Figma]

- Designed and created a mobile application prototype for a centralized parenting assistant based on user analysis.
- Built functionalities for a child development logbook, a daily needs checklist, and a reminder system for important schedules such as immunizations and doctor's appointments.

ORGANIZATIONAL EXPERIENCE

Participant, JPMorgan Chase Find Your Fit in Asia: Analyst Development Program 2026 | (May 2026)

- Selected to attend an invitation-based online seminar introducing JPMorgan’s Analyst Development Program in Asia.
- Gained insights into financial analysis, banking career pathways, and analyst program expectations.

Participant, ASEAN Data Science Explorers 2025 | (April 2025)

- Attended the SAP Analytics Cloud enablement session hosted by the ASEAN Foundation and SAP to enhance understanding of data analysis

Participant, Arkavida 9.0 Competitive Programming | (May 2025)

- Participated in a programming competition hosted by the Computer Science Student Association of Institut Teknologi Bandung (ITB) to test and improve algorithmic and logical programming skills.

Member, Learning & Training (L&T) Division, Bina Nusantara Computer Club (BNCC) | (June 2024)

- Selected to join a Company Visit & Focus Group to gain direct insights into the technology industry and expand professional networks.

LICENSES & CERTIFICATIONS

Oracle Data Platform 2025 Certified Foundations Associate, Oracle | (May 2026)

- Certified by Oracle University, demonstrating foundational knowledge of Oracle Database, data platforms, and Oracle Cloud technologies.

C Programming Certificate of Completion, Bina Nusantara Computer Club (BNCC) | (September 2025)

- Completed an intensive C programming course and achieved a High Distinction predicate.

SKILLS

Programming: Python, Java, C, C++, JavaScript, SQL

Web: HTML, CSS, JavaScript

Data & Analytics: Google Analytics (GA4), PostHog, Supabase (PostgreSQL), data analysis, funnel analysis

Tools: Git, GitHub, Vercel, Figma

Languages: English, Bahasa Indonesia

VOLUNTEER EXPERIENCE

Volunteer, Community Iftar & Charity Drive | (March 2025)

- Actively participated in organizing a community iftar (breakfasting) event and distributing staple food packages.
- Collaborated with other volunteers to ensure the smooth execution of the event.

Volunteer, Environmental Preservation at Tzu Chi | (October 2025)

- Actively participated in sorting various types of waste, such as plastic bottles and glass.
- Applied the 5R principles (Refuse, Reduce, Reuse, Repurpose, Recycle) directly and collaborated with other volunteers to help preserve environmental sustainability.

Volunteer, Community Iftar Event | (March 2026)

- Coordinated and worked with fellow volunteers to ensure all event preparations and execution ran smoothly and in an organized manner.
- Actively participated in preparing logistical and operational needs for the community iftar event.

ADDITIONAL INFORMATION

- Internship availability period:
